BUREAU OF ANIMAL INDUSTRY.

JOHN R. MOHLER, CHIEF OF BUREAU.

SERVICE AND REGULATORY ANNOUNCEMENTS.

SEPTEMBER, 1918.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICE REGARDING MEAT INSPECTION.**HANDLING SWINE FOUND ON ANTE-MORTEM INSPECTION TO BE AFFECTED WITH CHOLERA.**

The following instructions should be observed in the handling of swine detected on ante-mortem meat inspection to be affected with cholera and which are held for treatment as permitted in Regulation 9, section 7, paragraph 3, Amendment 4 to B. A. I. Order 211:

- (a) The term "treatment with antihog-cholera serum" refers to either the "serum-alone" or the "simultaneous-inoculation" method, as outlined in Regulation 6, B. A. I. Order 245, and Amendment 3 thereto.

¹ Conducts slaughtering.

(b) The release provided for in the meat-inspection regulation shall not be construed as being in conflict with or as superseding bureau instructions based on the provisions of B. A. I. Order 245 relative to handling and disinfection. Swine treated under the meat-inspection regulation may be released for purposes other than slaughter after the expiration of not less than 30 days from the date of treatment, provided they exhibit normal temperatures and do not show any other symptoms of cholera. If so released they shall be disinfected in accordance with Regulation 6, paragraph 2, section 2, of B. A. I. Order 245 and paragraphs 68 and 69 of the "Instructions Concerning the Work of the Field Inspection Division" before they are removed. However, the requirement that the animals be held 30 days and that they be disinfected before they are released does not apply in case the owner chooses to discontinue the treatment and tenders the animals for slaughter.

REPORTING FINDING ANIMALS AFFECTED WITH CONTAGIOUS DISEASE (F. I. FORM 11-C).

Some meat-inspection and stockyard stations are neglecting to follow the instructions in Service and Regulatory Announcements for April and August, 1917, and to report hog cholera on F. I. Form 11-C, even though the necessary information for completing the report may be readily obtained. Every effort is being extended to reduce still further the loss from hog cholera, and it is important that bureau employees give this matter proper attention. The report forwarded to the Washington office should show that a duplicate has been mailed to the inspector in charge of control work.

The following is a list of bureau inspectors in charge of hog-cholera control work who should receive the duplicate report as early as possible:

Alabama, Montgomery.....	Dr. H. C. Wilson, 212 State Capitol.
Arizona, Phoenix.....	Dr. J. P. Jacks, care of State veterinarian, Statehouse.
Arkansas, Little Rock.....	Dr. Joe H. Bux, Old Statehouse.

UNITED STATES RAILROAD ADMINISTRATION SCRIP.

The attention of all employees who use the new scrip now issued by the railroads under Federal control is called to the fact that great care must be taken in reporting the same on Form T-12, in order that the proper accounting may be made for each coupon. These coupons must be reported the same as heretofore, notwithstanding the fact that they are not numbered consecutively as was the old form of scrip. A sample report is given below for the information of all concerned:

REGULATIONS OF UNITED STATES EMPLOYEES' COMPENSATION COMMISSION.

The bureau has on hand and will mail to each official in charge of a station a copy of the regulations issued by the United States Employees' Compensation Commission under the act of September 7, 1916, and also a copy of the printed list of medical officers, hospitals, and physicians available for the treatment of injured civil employees of the United States under the act mentioned.

ECONOMY IN USE OF SUPPLIES.

The difficulties incident to obtaining and transporting all kinds of supplies and equipment render necessary the most rigid economy in their use. Bureau employees are urged not to waste or use unnecessarily a single paper clip, pen, pencil, sheet of paper, envelope, printed form, or any other article. Save every sheet of paper and envelope you can. Do not write letters of transmittal to accompany self-explanatory forms. Limit typed letters to one sheet wherever possible by writing them in single space with a free use of paragraphs and a double space between paragraphs. Do not use a large envelope when a smaller one will serve as well. No matter how small the saving of a single item may seem, the aggregate is large, and the saving is necessary if the normal needs of the service are to be met. The hearty cooperation of every employee is earnestly requested in this vital matter.

PRESS COPYING OF CORRESPONDENCE, ETC., DISCONTINUED.

In order to conserve time, labor, and materials, all stations and offices of the bureau are instructed to discontinue press copying of all correspondence, unless permission to the contrary is obtained in writing from the Washington office. Forms printed with copying ink may be press copied. Forms printed with record ink, whether originating in Washington or in the field, must not be press copied. Every office is, or upon request will be, supplied with carbon paper and tissue paper with which to make the necessary copies of correspondence. Hereafter record typewriter ribbons will be furnished on request, except that copying ribbons may be supplied in limited quantities if their need is properly explained when the requisition is submitted.

PUBLICATIONS IN SEPTEMBER.

[The bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to officers in charge for distribution to members of their forces. The number of copies sent varies with the subject or nature of the publications and the number and class of employees. Officers in charge will use their judgment and distribute publication to best advantage. So far as possible additional copies will be furnished on request.]
